

**Reliable GenPowex diesel
generating sets and diesel pumps
for demanding uses.**

Since 1952, AGCO Power Inc. GenPowex has designed and produced diesel power stations and diesel pump stations for uses that require great reliability. Typically high reliability, and thus a back-up power source, is required in hospitals, fire stations and rescue stations, nodal points of computer and communication networks, for back-up lighting and air conditioning of large public estates, and in industries where the production ceases if the flow of electricity is cut.

GENPOWEX diesel generating sets:

- AJ Series, power range 15...30 kVA
- SG Series, power range 60...280 kVA
- VP Series, power range 250...630 kVA
- PE Series, power range 800...2000 kVA

Our assortment of diesel generating sets covers the power range from 12 to 1800 kW.

Uses for stand by and primary power stations

- industry
- agriculture
- electric stations
- public estates
- renovation sites

GENPOWEX diesel pumps:

GENPOWEX diesel pumps overall service comprises designing, manufacturing and, if need be, start-up assistance, training of users, maintenance and spare parts services.

PRODUCTS

- diesel pump sets for sprinkler and fire water pump systems
- diesel pump sets for process and feed water back up systems
- electric motor-driven pumps for sprinkler and fire water pump systems
- jockey pumps
- control units for electric pumps
- containerized pump units

SPRINKLER PUMP SETS

Diesel and electric pump sets designed for sprinkler use are designed and manufactured according to CEA4001 sprinkler rules.

AGCO POWER INC. GENPOWEX

The company was founded in 1942 and was known by the name of Valmet until the halfway of the 1990's. After that the name was Sisu Diesel until October 2008, when it was changed to AGCO POWER. From the beginning of year 2004 AGCO POWER has been a part of international AGCO Corporation. **GENPOWER** is a trademark and business unit of AGCO POWER.

After sales

As the back-up power generator has to work even after long periods of no use, it needs maintenance. At the time of acquisition of a back-up power station or a sprinkler pump station one should make sure that reliability of the stations to keep up safety is secured. Our experienced service team for maintenance and spare parts helps offer the machine a long period of use and guaranteed operation.

MAINTENANCE AND SPARE PARTS

GENPOWEX maintenance and spare parts service offers you the know-how based on manufacturing and designing of diesel engines and diesel generating sets that has continued for decades.

- service contracts
- spare parts straight from our warehouse
- on-site maintenance and repair services
- electric and automation systems knowledge
- start-ups and personnel training
- old stations' renovations
- modernization of automation systems

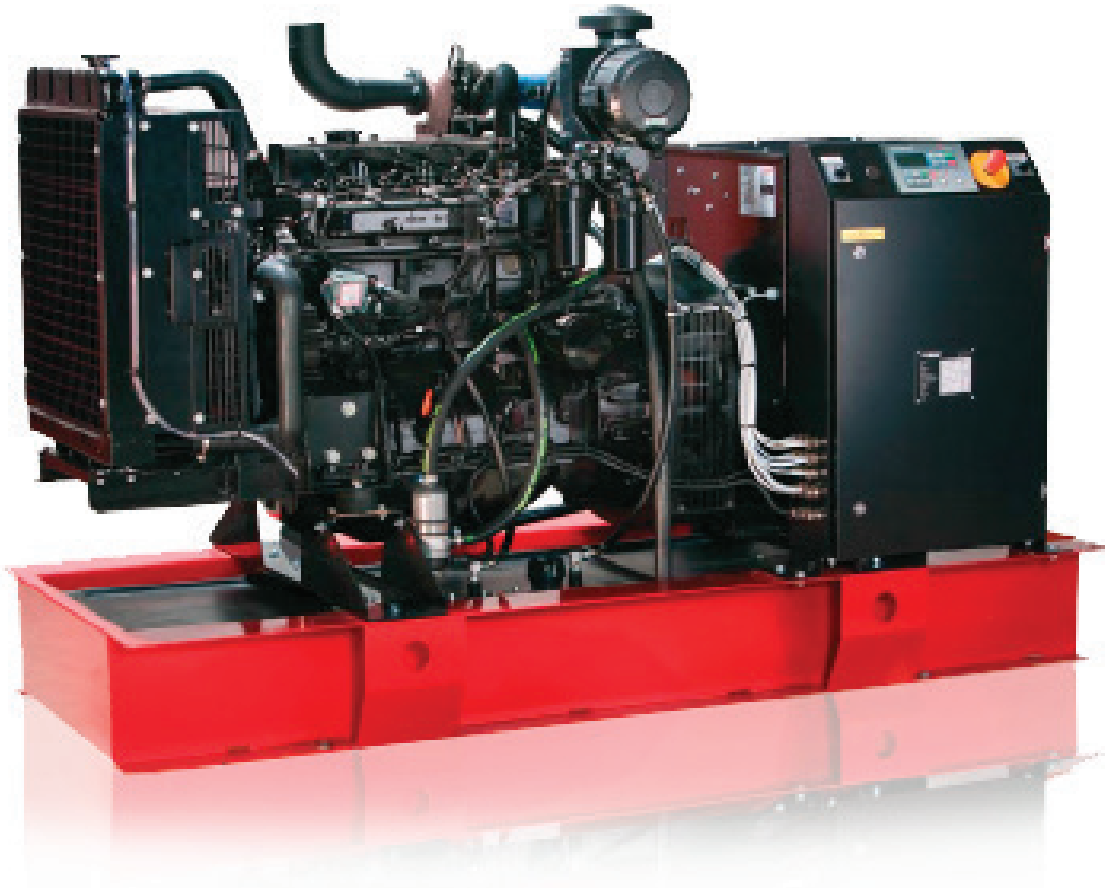

Each genset and pump set is thoroughly tested and load test run before delivery with modern genset test facility

GENPOWEX

GENPOWEX diesel generating sets and diesel pumps have been designed for uses, that require high reliability.
