You invest in a bin to protect your product from the elements, but what is guarding your grain from spoilage on the inside? Grain Guard has an established catalog of aeration and conditioning equipment to assist you in managing your grain storage.

With more than 100,000 fans in operation Grain Guard remains the leader in aeration design

LOW TEMPERATURE SUPPLEMENTAL HEATERS

LOW TEMPERATURE SUPPLEMENTAL HEATERS ALLOW 24 HOUR GRAIN DRYING WHEN HIGH HUMIDITY CONDITIONS PREVAIL. THE HEATER IS EASILY INSTALLED BETWEEN THE FAN AND BIN.

- Lowers humidity up to 50%
- Raises air temperature approximately 8°–14°C
- Propane or natural gas (Natural gas heaters operate on lbs. pressure only. Min. 2 lbs. pressure required)
- Available for in-line and high speed centrifugal fans

- Electronic ignition
- Static pressure switch
- High heat limit safety switch
- 60,000 btu available in 9"x14" or 18" round (3 HP fan)
- 100,000 btu available in 9"x14" or 24" round (5 HP & 7 HP fans)

EQUILIBRIUM MOISTURE CONTENT (EMC)

EMC reflects moisture levels in grain when exposed to the certain humidity levels and temperatures for a period of time.
